TITLE : SEALED BATTERY

ABSTRACT : PROBLEM TO BE SOLVED: To provide a sealed battery having an electrode header excellent in port sealing characteristics.

SOLUTION: In this sealed battery having an electrode header 5 mounted with an electrode deriving pin 4 of polarity different from a battery can through an insulating member 13, the insulating member 13 is formed in a plate shape constituting the electrode header 5 by insert-molding. The electrode deriving pin 4 is mounted on a through hole 3 disposed on the insulating member 13 keeping air-tightness.
